The Citadel of Corten Steel

Corten Steel effects

Corten Steel

Corten Steel (sometimes known as weathered steel) is a group of steel alloys that are often used in outdoor construction. Corten Steel was designed to eliminate the need for painting and if left outside, exposed to the elements, they will develop a rusted appearance in just a few months.

Features Advantages and Benefits of **Surfacort**

Bringing the richness of Corten steel on Aluminium Sheets.

Features

- Seamless Installation
- Color Option in Different Stages of Corrosion
- Available in 4ft x 8ft (1200x2400mm)
- Thickness:- 2mm,2.5mm,3mm

Advantages

- Avoid residuals of Rust
- Better Rustic Finish
- Can be used in Any weather conditions
- Material Longevity
- Riveting system
- Easy to Handle
- Flexibility

Benefits

- Warranty of 10 Years for color variation and Color fading.
- Economical compared to other façade cladding
- Maintenance free Surroundings
